Libraries in the Context of Capitalism Symposium
METRO, NYC, Feb. 2 2018
What capitalist metaphors or language do you use with colleagues/patrons/administrators?
The Language of Information Literacy

Nora Almeida
What's in a word?

Do capitalist metaphors work to...

- Position students as consumers?
- Simplify knowledge production environments?
- Reinforce neoliberal ideology?
Capitalist Rhetorical Paradox

If capitalist metaphors capture reality of neoliberal institutions and “knowledge economy”....

- Can we address these ideas without legitimizing them?
- How is this critique related to the goals of information literacy instruction?
Information Literacy: A brief history in 2 texts

- **1989** American Library Association Presidential Committee on Information Literacy publishes a *Final Report* that formally establishes IL as a professional touchstone.
“Information has value in direct proportion to the control it provides [the consumer] over what he is and what he can become.”

“Libraries seek to reach out to precisely the same people to whom the private sector is seeking to market similar or even identical services. From an economic standpoint there is a real danger that this kind of unfair competition will destroy the economic viability of the creator of the [information] service involved.”
“A concomitant of free expression is the need for the user to have confidence in the information source on which he proposes to rely. Subsidization of activities that preempt alternative sources eliminates one base for confidence: competition among products delivering concepts and ideas.”

“Government should not perform services for its citizens which the citizens are capable of performing themselves”
“Information literacy is a survival skill in the information age.”

“Although libraries historically have provided a meaningful structure for relating information in ways that facilitate the development of knowledge, they have been all but ignored in the literature about the information age.”
“Within America’s information society, there also exists the potential of addressing many long-standing social and economic inequities.”

“The cultural and educational opportunities available in an average community are often missed by people who lack the ability to keep informed of such activities, and lives of information illiterates are more likely than others to be narrowly focused on second-hand experiences of life through television.”
Neoliberalism Unleashed

Romel Espinel
Over the past 40 years, neoliberalism has crept into all aspects of life.

- Privatization
- Corporatization
- Free trade
- Competition
Aided by unending wars, globalization, global warming, and shortages of resources . . .

- Consolidation of Power & Capital
- Falling wages
- Diminishing power of unions and workers movements
- Dismantling of welfare state
By 2009 when Pres. Obama declared October National Information Literacy Awareness Month

Neoliberalism embedded in our best efforts:

- "Crisis in Authenticity" = Necessity through "Crisis" (Shock Doctrine)
- "Information Marketplace"
- "Competencies" with the new modes of production (new tech)
- "Taking advantage of information for themselves"
- "Informed Citizenry"
2009 was also the year the world economy was in disarray

So the “Informed Citizen” was no longer the Jeffersonian:

“An educated citizenry is a vital requisite for our survival as a free people”

Instead, an educated citizenry is vital to the survival of themselves as a wage-slave in fast-changing, retooling of the marketplace ruled by inter-imperialist rivalry. STEM everybody!
The “promises of information literacy” with capitalist constraints

• Better informed
• Efficient
• Democratic
• Reflective
• Smarter
“Never mind what's been selling
It's what you're buying”

-Fugazi

IF not taught within the context of capitalism and the power structures that control knowledge, then IL becomes about

- Tracking
- Outsourcing
- Individualization
- Surveillance state
- Sowing more class, race, sex divisions
Capitalism and the Practice of Information Literacy Education

Eamon Tewell
The commodification of information is an ongoing project of neoliberalism,

Which is intertwined with the commodification of information literacy,

Which is intertwined with the commodification of higher education,

And so forth...
“The discourse of information literacy links the selective consumption of information to the production, pedagogically speaking, of autonomous subjects.

But information is a commodity—and not only a commodity, but the preeminent commodity-form of contemporary capitalism”

- Cathy Eisenhower and Dolsy Smith

“The Library as ‘Stuck Place’: Critical Pedagogy in the Corporate University,” 2010
The One-Shot Session

Represents most academic librarians’ only opportunity to teach students in the classroom setting

Reflective of corporate time and accelerated, surface-level learning (Nicholson, 2016)

Dependent on collaboration with faculty, who are often also stretched thin and/or in contingent positions
“Information literacy is not an ahistoric truth, it is a form of academic capitalism that allows librarians to stake a claim for themselves in the higher education curriculum—and more broadly in the information or knowledge economy”

- Karen Nicholson

“‘Taking Back’ Information Literacy: Time and the One-Shot in the Neoliberal University,” 2016
Over-reliance on demonstrating databases within instruction due to limited time and other factors, which leads to further reinforcement of scholarly communication status quo

We sell the same products to students that are sold to our libraries, primarily because they’re sold to our libraries
“We often operate as extensions of the database vendors whose products we rent and encourage our students to consume for the brief time that they are with us...

With fewer people juggling more work, it becomes easy to fall back on database training as the sum total of our teaching efforts”

- Patti Ryan and Lisa Sloniowski
Information literacy is produced by and helps to produce the imperatives of capitalism.

We can and should push back, but this is largely dependent on our status within the workplace.

To resist capitalism’s overdetermination of what’s possible within libraries, it is essential to build collective power; to unionize and create coalitions.
And ... They Need a Job

Lisa Janicke Hinchliffe
Getting a Better Job Motivates Going to College

Many are Studying to Be Capitalists

“Of the 1,870,000 bachelor's degrees conferred in 2013–14, the greatest numbers of degrees were conferred in the fields of business (358,000), health professions and related programs (199,000), social sciences and history (173,000), psychology (117,000), biological and biomedical sciences (105,000), and education (99,000)…”

Choosing to Navigate the Tension

Resist the Temptation of Neutrality

Accept the Obligation of Positionality
"The examples must be relevant to the course content and cannot confuse or distract learners, but within these broad parameters we have a great deal of latitude in selecting examples …

Examples convey messages about values and the importance of certain topics. This is true whether the examples are intentionally chosen to do so or inadvertently do so. I would go so far as to claim that there is an ethical responsibility to be intentional about examples because examples convey messages beyond their utility for demonstrating strategy or tools."

MY GOAL: information literacy instruction that prepares students for their careers while also seeking to develop their critical information literacy abilities.
Ideas for Critical Resistance
